

NO NATION TRUCK

As No Nation Truck Collective we came together in 2019 to counter the racist policy of deterrence at the external borders of the EU with a response based on

solidarity. Our goal is to support people on the move in a direct and unbureaucratic way, to act as flexibly as possible on and next to escape routes, and to be able to set different focuses, consisting of medical aid, food distribution, power supply, squat support and the documentation of border violence. The main actor besides us as a collective is our truck, which has been specially built for our work and contains a kitchen, a first aid area and a power supply system to be able to charge several dozen mobile devices.

We have been on the road with it since January 2021 - initially along the French-British border and now in the mountains of the Italian-French border region. Our work there consists mainly of supporting so-called "wild camps" where refugees live together, providing electricity at fixed times so that the various camp communities can recharge the electrical devices that are important to them, cooking more or less regular meals, and monitoring border violence, such as evictions from so-called "wild camps." In addition, we are busy building networks with other organizations and collectives that have similar goals as we have and do not want to accept the racist conditions at the external borders as well as within the EU any longer. You can read more about this regularly on our blog, our Telegram channel and the usual social media channels.

With your support you help us to continue this work in an undogmatic and direct way. Please follow us on the mentioned channels, tell your comrades and friends about the unacceptable criminalization of flight and migration at the European borders or become active yourself. You are also welcome to simply contact us directly about how and if you can support us.
